

Protocols for the reopening of school physically 2021

Physical Reopening

- Digital Thermometers for everyone's temperature to be tested before entering the compound
- Sinks have been installed for the washing of hands at all of the doors to the school. At these sinks we have soap and paper towels
- Hand sanitizer pumps have been placed strategically throughout the school
- Touch-less hand soap dispensers are in the bathrooms
- Paper towel holders for individual use
- Dustbins with covers are in all rooms
- Classrooms have been split and desks set up with social distancing guidelines. We are also currently finalizing desk separators

Things to be implemented:

- Staggered breaks
- Restricted entrance to school for parents and visitors unless absolutely necessary
- Markings on the playground to indicate social distancing to assist students

We have been successfully carrying out our online classes over the last 2 terms. Should the Ministry of Education/Government indicate that we have to continue classes online, our teachers, who have been working diligently preparing for either scenario, will be ready. This is no easy task for our teachers, but their unwavering dedication to your children is the driving force to ensure no matter what scenario takes place, we are ready.
